

Format Policy for Auth Info Code

July 2019

Introduction

The Auth Info code <auth info> is generated by the Registrar and required at the time a Domain name is created. It is most commonly used when a domain name is transferred and provided to the registrant so that the registrar can initiate the transfer commands, at which time the code is a required field.

Format

The format for <auth info> requires a minimum length of 08 characters and a maximum length of 32 characters.

Additionally, <auth info> must contain at least one of each of the following three character types:

- Alphabetic character: 'a' – 'z', 'A' – 'Z';
- Numeric character : '0' – '9';
- Special characters: Refer to the following table.

Special Character	Code Point	Special Character	Code Point
!	U+0021	;	U+003B
"	U+0022	<	U+003C
#	U+0023	=	U+003D
\$	U+0024	>	U+003E
%	U+0025	?	U+003F
&	U+0026	@	U+0040
'	U+0027	[U+005B
(U+0028	\	U+005C
)	U+0029]	U+005D
*	U+002A	^	U+005E
+	U+002B	_	U+005F
,	U+002C	`	U+0060
-	U+002D	{	U+007B
.	U+002E		U+007C
/	U+002F	}	U+007D
:	U+003A	~	U+007E
